

Longnose Hawkfish

(*Oxycirrhites typus*)

Maximum length: 5 inches

Minimum aquarium size: At least 30 gallons, preferably 60 gallons or more

Life span: Five to eight years

Ease of care: Easy, provided there is enough room and suitable tankmates

Specific gravity: 1.020 to 1.025

pH: 8.1 to 8.4

Temperature range:

72 to 78 degrees Fahrenheit

Diet: Marine meaty foods, including frozen prepared foods, freeze dried krill, squid, feeder shrimp, mussels, chopped up fishes and flake foods. This species is easily trained and should accept most foods.
