

Free Aquarium-Hobby Downloads

There are aquarium-hobby downloads aplenty on FishChannel — just move your mouse!

Posted: November 20, 2009

Just a reminder to all you Internet fans — FishChannel.com has lots of helpful (and free) aquarium-hobby downloads available to FishChannel users.

One of the most-beneficial aspects of FishChannel.com for hobbyists are all of the free downloads available. Pictured in this short blog are just a few of the many free, full-page, color guides available for the taking. Just load your printer tray and click away. All of the new, and archived, downloads can always be found at FishChannel.com/Downloads.

Some of my personal favorites —

- 1) [Things You Can Do To Save Reefs](#) — this timely piece empowers aquarists with 18 practicals they can engage in to make a difference. You can click here to download your copy.
- 2) FAMA's ["Reef Tank"](#) and ["Planted Tank"](#) maintenance schedules — these handy one-page sheets break down aquarium maintenance chores into daily, weekly, biweekly and monthly sections. You can download your reef tank schedule here, and your planted tank schedule here.
- 3) For a more in-depth approach, visit [Aquarium Fish International's reef](#), [FOWLR](#) and [freshwater aquarium logs](#).

There of lots of other goodies, too.
